

Get the most from your exterior paint.

Durability

Benjamin Moore paints are formulated to bond to exterior surfaces, and resist cracking and peeling caused by weathering, sunlight and abrasion.

Application

Benjamin Moore paints are designed for ease of application, which result in ideal performance as well as virtually no spattering.

Hide

Benjamin Moore uses the highest quality materials to achieve a superior hide, completely covering any stain or previous colour on the exterior surface.

colour retention	our best	excellent	very good	very good
mildew resistance	our best	excellent	excellent	very good

Colour Retention

Exterior finishes are constantly exposed to harmful UV rays. Thanks to our waterborne colourant technology, our paints are able to resist fading and maintain their original colour.

Mildew Resistance

Mildew is prevalent in moist, humid and warm climates. Benjamin Moore paints are formulated to resist the growth of mould and mildew.

Choosing the right finish

- **FLAT** creates a smooth, non-reflective finish that gives you the ability to hide imperfections while also offering an ultra smooth appearance.
- **LOW LUSTRE** is a lightly reflective and smooth sheen that offers a rich appearance.
- **SATIN** is a very versatile finish, giving you a subtle shine that can be used anywhere.
- **SOFT GLOSS** is a shiny, durable finish that is great for windows, shutters, doors and other trim work.
- **SEMI-GLOSS** has a lustrous shine making it a great option for areas that you want to highlight.
