Benjamin Moore®

REGAL® SELECT
PREMIUM INTERIOR PAINT & PRIMER
ULTI-MATTE K552

Features
- Proprietary technology for easy stain removal
- Excellent hide
- Highly washable
- Easy application, clean up and touch up
- Zero VOC, low odour
- Self-priming on most substrates
- Provides a mildew resistant coating
- Spatter-resistant

Recommended For
Residential or commercial high traffic applications where a premium quality matte finish is desired. New or previously painted wallboard, plaster, masonry, or wallpapered surfaces; primed or previously painted wood or metal; new or coated acoustic ceilings.

Certifications & Qualifications:
VOC compliant in all regulated areas.
- Zero VOC
- Class A (0-25) over non-combustible surfaces when tested in accordance with ASTM E-84
- Master Painters Institute MPI # 53, 53 X-Green™, 143 and 143 X-Green™
- Anti-microbial — This product contains antimicrobial additives that inhibit the growth of mould and mildew on the surface of the paint film

General Description
A premium quality 100% acrylic matte finish that washes clean with soap and water. It uses a proprietary stain release technology. Most common household stains like dirt, grime, lipstick, catsup, and washable markers can be easily removed with mild soap and water. Regal Select is self-priming on most substrates.

Recommended For
- Residential or commercial high traffic applications where a premium quality matte finish is desired.
- New or previously painted wallboard, plaster, masonry, or wallpapered surfaces.
- Primed or previously painted wood or metal.
- New or coated acoustic ceilings.

Limitations
- Do not apply when air and surface temperatures are below 10 °C (50 °F)
- Contact Benjamin Moore for values of other bases or colours.

Benjamin Moore’s Green Promise® designation is our company’s assurance that this product meets — and often exceeds — rigorous environmental and performance criteria regarding VOCs, emissions, application, washability, scrubbability and packaging, while also delivering the premium levels of performance you expect from Benjamin Moore.

This Benjamin Moore product has been tested by independent third parties and meets or exceeds the published chemical restriction and performance criteria of the Green Seal™ G5-11 2015 standard.
Surface Preparation

Surfaces to be painted must be clean, dry, and free of dust, dirt, grease, oil, soap, wax, scaling paint, water-soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

Difficult Substrates: Benjamin Moore® offers a number of specialty primers for use over difficult substrates such as bleeding woods, grease stains, crayon markings, hard glossy surfaces, galvanized metal, or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin Moore® retailer can recommend the right problem-solving primer for your special needs.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by logging onto Health Canada @ https://www.canada.ca/en/health-canada/services/environmental-workplace-health/environmental-contaminants/lead/lead-information-package-some-commonly-asked-questions-about-lead-human-health.html

Primer/Finish Systems

Regal® Select Finish is self-priming on most surfaces. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. While the high quality of our products sometimes makes one-coat coverage achievable, Benjamin Moore recommends two coats of this product to achieve full colour development and to maximize paint film performance. The chart below is for general guidance. The chart below is for general guidance.

Application

Mixing of Paint: Stir thoroughly before and during use. Apply one or two coats. For best results, use a premium Benjamin Moore® custom-blended nylon/polyester brush, premium Benjamin Moore® roller, or a similar product. Apply paint generously from unpainted area into wet area. This product can also be sprayed.

Thinning/Clean Up

Conditioning with Benjamin Moore K518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance.

<table>
<thead>
<tr>
<th>Mild conditions</th>
<th>Severe conditions</th>

</tbody>
</table>

Brush: Nylon / Polyester
Roller: Premium Quality 10 mm (3/8")
Spray: Airless Pressure: 1,500 -2,500 psi Tip: 0.013 - 0.017

Thinning is unnecessary, but if required to obtain desired application properties, a small amount of clean water may be added. Never add other paints or solvents. Wash painting tools thoroughly after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

Environmental Health & Safety Information

Use only in a well-ventilated area. Keep container closed when not in use. In case of spillage, absorb with inert material and dispose of in accordance with local regulations. Wash thoroughly after handling.

KEEP OUT OF REACH OF CHILDREN
PROTECT FROM FREEZING
