ULTRA SPEC®
INTERIOR/EXTERIOR ACRYLIC
HIGH-BUILD MASONRY PRIMER 609

Features

- Reduces the porosity of masonry surfaces.
- Provides excellent surface adhesion.
- High alkali resistant – up to pH 13.
- Higher hiding.
- Tintable.

General Description

Ultra Spec® Interior/Exterior Acrylic High-Build Masonry Primer (609) is designed to penetrate and seal the surface of new or previously painted masonry surfaces providing the proper foundation for subsequent finish coats. It can be applied to masonry with pH levels as high as 13.

Recommended For

- For commercial and residential applications
- For application to new or previously painted interior/exterior surfaces including: tilt-up concrete construction, stucco surfaces, block construction.

Limitations

- Do not apply when air and surface temperatures are below 50 °F (10 °C).

Product Information

Colors — Standard:

White (01)

(White may be tinted to light colors with up to 2.0 fl. oz. Benjamin Moore® Gennex® colorants per gallon)

— Tint Bases:

Not available

— Special Colors:

Contact your Benjamin Moore representative.

Certifications & Qualifications:

VOC compliant in all regulated areas

Qualifies for LEED® v4 Credit
Qualifies for CHPS low emitting credit
(Collaborative for High Performance Schools)
CDPH v1 Emission Certified
Master Painters Institute MPI # 3, 3 X-Green™

Technical Assistance

Available through your local authorized independent Benjamin Moore retailer.

Ultra Spec® Interior/Exterior Acrylic High-Build Masonry Primer 609

Surface Preparation
Surface must be dry, clean, and sound; free of chalk, peeling paint, form oils, efflorescence, and mildew. Remove chalk, surface deposits, and loose or scaling paint by scraping, sanding, and preferably power washing.

Glossy areas should be dulled. Un-weathered areas must be power washed or scrubbed with a detergent solution and rinsed to remove surface salts that can interfere with adhesion. Loose, sandy masonry should be hosed down thoroughly to remove surface particles and allowed to dry.

For masonry that has been allowed to cure for a minimum of 7 days under normal drying conditions and has a pH of 13 or less may be sealed with Ultra Spec® Interior/Exterior Acrylic High-Build Masonry Primer (609) prior to finishing.

A common exterior paint failure on masonry construction is peeling and scaling, often caused by painting over chalk deposits. The most practical and efficient way to remove this substance is by power washing. Multiple coats of paint that are in an advanced state of deterioration or prior applications of cement based coatings must be removed to a sound substrate.

**WARNING!** If you scrape, sand or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.**

Primer/Finish Systems
New surfaces should be fully primed, and previously painted surfaces may be primed or spot primed as necessary.

**Rough or Pitted Masonry:**
- **Primer:** Ultra Spec® Interior/Exterior Acrylic High-Build Masonry Primer (609)
- **Finish:** Appropriate Benjamin Moore exterior house paint, or use Ultra Spec® Masonry Elastomeric Waterproof Coating — Low Lustre (0360) or Flat (0359)

**Smooth Poured or Pre-cast Concrete:**
- **Primer:** Ultra Spec® Interior/Exterior Acrylic High-Build Masonry Primer (609)
- **Finish:** Appropriate Benjamin Moore exterior house paint, or use Ultra Spec® Masonry Elastomeric Waterproof Coating — Low Lustre (0360) or Flat (0359)

**Repaint, All Substrates:** Prime bare areas with the primer recommended for the substrate above.

Application
Do not apply when air and surface temperatures are below 50 °F (10 °C).

**Brush:** Stir thoroughly and apply generously as received in the container with a good quality synthetic brush. Work into crevices to ensure adequate penetration and sealing.

**Roller:** Stir thoroughly and apply generously as received in the container with a good quality long-nap roller. Work into crevices to ensure adequate penetration and sealing.

**Spray, Airless:** Fluid Pressure — 1,000 to 2,000 PSI; Tip—.013–.017 Orifice

**Thinning/Cleanup**
Thinning is unnecessary, but if required to obtain desired application properties, a small amount of clean water may be added. Never add other paints or solvents.

Clean brushes, rollers and other painting tools in warm soapy water after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

**Environmental, Health & Safety Information**
Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator to control exposure. Use only with adequate ventilation.

**FIRST AID:** In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

**IN CASE OF SPILL:** — Absorb with inert material and dispose of as specified under Thinning/Cleanup.

**KEEP OUT OF REACH OF CHILDREN**
**PROTECT FROM FREEZING**

Refer to Safety Data Sheet for additional health and safety information.
