## Features
- 100% Acrylic
- Durable finish that resists fading
- Self-priming on many surfaces
- Protects against cracking & peeling
- Provides a mildew-resistant coating

## General Description
A 100% Acrylic Exterior Paint which provides lasting service over new or previously painted surfaces in good condition. This paint will provide a durable and protective finish on any properly prepared and primed exterior surface.

## Recommended For
For exterior wood, masonry, hardboard and metal in commercial, institutional and residential applications. Use on exterior siding, foundations, fascia, shutters or retaining walls. Designed as a self-priming system on non-bleeding woods, smooth poured or pre-cast masonry and clean, properly prepared galvanized metal surfaces.

## Limitations
- Do not apply when air and surface temperatures are below 40 °F (4.4 °C).
- Not for interior use

## Product Information
### Colors — Standard:
- Tintable White (1)

### — Tint Bases:
- Tint Base (33), Accent Base (36)
- Tint with Benjamin Moore® Gennex® colorant only

### — Special Colors:
- Contact your dealer

### Certifications & Qualifications:
**VOC compliant in all regulated areas**

The products supported by this data sheet contain a maximum of 50 grams per liter VOC/VOS (0.42 lbs. /gal.) excluding water & exempt solvents. Master Painters Institute MPI # 10

### Technical Assistance:
Available through your local authorized independent dealer. For the location of the dealer nearest you, call 1-866-708-9180, or visit www.coronadopaint.com
Surface Preparation

Surfaces must be clean, dry and free of grease, wax, and mildew. Remove any chalk and loose or scaling paint. If previously coated with cement-base waterproofing paints, clean by sandblasting. Glossy surfaces must be dulled. Un-weathered areas such as eaves, ceilings, and overhangs should be washed with a detergent solution and/or rinsed with a strong stream of water from a garden hose to remove contaminants that can interfere with proper adhesion. Stains from mildew must be removed by cleaning with an anti-mildew wash prior to coating the surface.

Caution: Refer to the detergent solution’s data and material safety data sheet for instructions on its proper use and handling. For metal surfaces, remove all active rust. Wipe down with paint thinner to remove surface oils.

All new masonry substrates must be allowed to cure for 30 days before priming or painting.

Priming

Wood – Non-bleeding: Apply 1-2 coats of Cryli Cote®
Wood – Bleeding: Prime redwood, cedar and other bleeding woods with a stain blocking primer

Galvanized and Aluminum: New galvanized metal surfaces must be thoroughly cleaned with an Oil & Grease Emulsifier to remove contaminants. Apply 1-2 coats of Cryli Cote®

Ferrous Metal: Apply a rust-inhibitive metal primer.
Masonry: Apply 1-2 coats of Cryli Cote®

WARRANTY: Manufacturer warrants that this product when used in accordance with the label instructions will not: 1. blister from properly prepared and primed surfaces, 2. peel from properly prepared and primed surfaces, and 3. wear down or weather to expose the previously painted surface. This warranty shall be effective for 20 years and is made to the original residential consumer paint purchaser. This warranty is non-transferable. If this product fails to perform as explained above when used according to label instructions within the warranty period, Manufacturer will, upon presentation of proof of purchase (original sales receipt), provide an equivalent or comparable product at no charge. Since we have no control over surface preparation or application, THIS LIMITED WARRANTY DOES NOT INCLUDE THE COST OF LABOR FOR APPLICATION OF PAINT. MANUFACTURER SHALL IN NO EVENT BE LIABLE FOR INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES, SOME STATES DO NOT ALLOW THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE LIMITATIONS OR EXCLUSIONS CONTAINED IN THE ABOVE WARRANTY MAY NOT APPLY TO YOU. This warranty gives you specific legal rights; you may also have other rights which vary state to state.

Application

Stir product with a circular, lifting motion before you begin to paint. Cryli Cote® may be applied by brush, spray or roller, at a rate of application not to exceed 450 square feet per gallon. Surface texture and porosity will affect actual yield. For best brush application results, use a quality synthetic filament brush. For roller application, use a 3/8” or 1/2” nap cover for smooth surfaces, a 3/4” nap cover for semi-rough surfaces and a 1” or 1 1/2” nap cover for rough surfaces. For spray application, thin with clean water, up to 20% reduction if necessary. Do not apply when surface or air temperatures are below 40 °F. Do not apply to hot surfaces or in direct sunlight. Do not apply if rain is threatening.

Clean Up

Clean up with warm, soapy water followed by a clean water rinse.

Environmental Health & Safety Information

WARNING!
Possible birth defect hazard. Contains, Carbamic acid, 1H-benzimidazol-2-yl-, methyl ester, which may cause birth defects based on animal data.

Use only with adequate ventilation. Do not breathe vapors, spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and cleanup. Follow respirator manufacturer’s directions for respirator use. Close container after each use. Wash thoroughly after handling.

FIRST AID:
In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

KEEP OUT OF REACH OF CHILDREN
PROTECT FROM FREEZING
