**SUPER KOTE 5000®**
**DRY FALL ACRYLIC LATEX**
**SEMI-GLOSS 112 LINE**

### Features
- Formula is ready to use for spraying out of the can
- Recoil in 4 hours
- Reduce cost of masking & covering
- Suitable for use in USDA inspected facilities

### General Description
Super Kote 5000® Latex Dry Falls are formulated for spray application to interior ceilings, walls and structural members in commercial and institutional buildings. The overspray dries to a dust before reaching the floor. This feature reduces the cost of masking and covering procedures.

### Recommended For
- For spray application to interior ceilings, walls and structural members in commercial, residential and institutional buildings.
- Properly prepared galvanized metal

### Limitations
- May be applied when surface and air temperatures are between 50 °F and 90 °F (10 °C and 32.2 °C).
- Spray application only.

Surface Preparation

Surface to be painted must be clean and free of dirt, chalk, mildew, wax, grease, rust or loose flaking paint. Dirt and chalk should be removed by power washing or hand scrubbing with an abrasive cleanser and water, followed by a clean water rinse. Mildew must be removed by washing the surface with a solution of one part household bleach mixed with six parts water. Rinse well with clean water following wash. Wax should be removed by solvent cleaning. Grease and oil should be cleaned using an Oil & Grease Emulsifier. Rust must be removed by blasting, hand sanding vigorously or by conscientious power tool cleaning. Remove loose, flaking paint by scraping. Feather sand rough edges to insure a smooth finish coat. Glossy surfaces must be dulled by lightly sanding. Remove sanding dust before paint application. Any exposed substrate should be spot primed with the appropriate primer.

Primers: New surfaces should be fully primed. Previously painted surfaces should be primed or spot primed as necessary. There are a number of specialty primers available in our family of brands that can be used on difficult substrates such as bleeding woods, hard glossy surfaces, or other substrates where paint adhesion or stain blocking is a problem. Your dealer can recommend the right problem solving primer necessary to meet your needs.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Informational Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Application

Stir product thoroughly prior to painting. Apply by airless spray tip size .013 - .019 @ 1800 - 3000 PSI at a rate up to 475 square feet per gallon. Changes in relative humidity will cause significant differences in the distance required for dry fall characteristics. At 50% relative humidity, the product will dry fall at 8 feet. However, at 90% humidity, as much as 15 feet will be necessary for overspray to dry. Do not apply when temperature is below 50 °F. Thinning is not generally necessary. If required, use clean water sparingly. NOTE: Adding water will affect the dry fall characteristics of this product by extending the drop distance necessary for overspray to dry.

Clean Up

Clean up with warm, soapy water. USE COMPLETELY OR DISPOSE OF PROPERLY. Dry empty containers may be recycled in a can recycling program. Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.

Environmental, Health & Safety Information

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer’s directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING Cancer and Reproductive Harm–www.P65warnings.ca.gov

FIRST AID: In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL – Absorb with inert material and dispose of as specified under “Clean Up”.

KEEP OUT OF REACH OF CHILDREN

PROTECT FROM FREEZING

Refer to Safety Data Sheet for additional health and safety information.
