DURALAQ®
275 VOC HP LACQUER SANDING SEALER 1C.2350

Features
- High Build
- Fast Drying
- Ready To Spray
- Contains No Aromatic Solvents

General Description
An economical, high build, high performance clear lacquer sealer designed especially for the contractor market. Formulated at a ready to use viscosity for most airless applications, this product series enables the applicator to achieve rapid film build with few coats. Excellent flow characteristics provides a smooth, easy-to-sand surface.

Recommended For
Use as a seal coat on new interior wooden surfaces such as doors, trim and paneling. Especially designed for use by contractors for on-site applications or in shop applications.

Limitations
- Entire system should not exceed 4 mils dry.
- Apply, by spray only, with temperatures above 68ºF.
- Not recommended for use over white stained or pickled finishes.

Certifications & Qualifications:
VOC compliant in all regulated areas

The products supported by this data sheet contain a maximum of 275 grams per liter VOC /VOS (2.29 lbs./gal.) excluding water & exempt solvents.

Technical Assistance:
Available through your local authorized independent Lenmar dealer. For the location of the dealer nearest you, call 1-866-708-9180 or visit www.lenmar-coatings.com

Volatile Organic Compounds (VOC)
275 Grams/Liter 2.29 Lbs./Gallon
Surface Preparation

New Wood: Remove all dirt and wood dust. Sand and remove all sanding dust. Before finishing be certain the wood is dry.

Old Wood: Many old wood finishes have containates that may effect top coating with lacquer. Be certain to remove old finish completely and be certain the surface is free of all contamination.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Informational Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Application

ENTIRE SYSTEM SHOULD NOT EXCEED MORE THAN 4 MILS DRY.

For best results apply a wet coat of 3-4 mils. This product is ready to spray and reduction is not necessary. Thinner may be used if required by specific application equipment and in compliance of VOC regulations. Retarder may be used (3-4 oz. per gallon) to extend the open time during periods of high humidity and / or high temperatures.

Airless Equipment: Atomization pressure 1000-1500 psi, 0.005 Fine-finish Tip, 0.011 Regular Tip, Temperature 77 °F.

Conventional Equipment: Fluid Pressure 10-15 psi, Atomization pressure 30-40 psi, Temperature 77 °F.

AIR DRY OR MAY BE FORCE DRIED AT UP TO 120 °F.

ENTIRE SYSTEM SHOULD NOT EXCEED 4 MILS DRY.

Finishing System

Sealer: HP Lacquer Sanding Sealer – One coat recommended.

Topcoat: 275 VOC DuraLaq Clear Lacquer

Clean Up

Clean with acetone.
