**General Description**

Lenmar® Duralaq® 1C.399 is a high viscosity nitrocellulose sanding sealer concentrate designed for interior wood applications only. The primary benefits of this sealer include its high solid content for initial build, excellent adhesion on properly prepared wood surfaces and ease of sanding. Once dry, 280-320 grit silicon carbide sandpaper should be used over this sealer and it will powder to a smooth surface quickly and easily. Duralaq® 1C.399 is compatible with any nitrocellulose lacquer topcoat. It is not recommended for use over pickle white stains. For a true non-yellowing finish over natural, white or pickle finishes, try Lenmar® Ultra-UniLaq® 1M.97X CAB Acrylic Series.

**Recommended For**

Window & Door Trim, Displays, Baseboards, Crown Moldings, Doors & Hand Rails.

**Limitations**

- Entire system should not exceed 4 mils dry.
