General Description
The Ultra UniLaq® 1M.97X Series products are unique Cellulose Acetate Butyrate (CAB) acrylic lacquers designed for woodworkers who demand ultimate clarity found only in a true non-yellowing solventborne lacquer. 1M.97X Series products are unlike traditional nitrocellulose lacquers in performance; they offer resistance to moisture, exceptional solids content and ready-to-spray viscosity. These fast drying acetate butyrate lacquers provide a durable finish that will resist cold checking and remain crystal clear over time. This product is ideal over pickle white stains, natural finishes or white systems.
