**Features**

- Soap and water cleanup
- Hard, durable finish with good gloss retention
- Crystal clear finish

**General Description**

These Waterborne Acrylic Urethane Clears represent the most recent technology. When cured, these crystal clear finishes exhibit outstanding hardness, durability, abrasion resistant and gloss retention.

**Recommended For**

On interior areas such as trim, furniture, doors or cabinets.

**Limitations**

**NOTE:** not recommended for use on floors.

### AQUA-PLASTIC™ URETHANE CLEAR 1WB.14XX SEMI-GLOSS / SATIN / DULL

#### Features

- Soap and water cleanup
- Hard, durable finish with good gloss retention
- Crystal clear finish

#### General Description

These Waterborne Acrylic Urethane Clears represent the most recent technology. When cured, these crystal clear finishes exhibit outstanding hardness, durability, abrasion resistant and gloss retention.

#### Recommended For

On interior areas such as trim, furniture, doors or cabinets.

#### Limitations

**NOTE:** not recommended for use on floors.

#### Colours — Standard:

- Clear
- 1WB.1410 Semi-Gloss, 1WB.1427 Satin, 1WB.1420 Dull

#### — Tint Bases:

N/A

#### — Special Colours:

N/A

#### Certifications & Qualifications:

The products supported by this data sheet contain a maximum of 350 grams per litre VOC / VOS excluding water and exempt solvents.

This product is compliant under the Ozone Transport Commission regulations as a Varnish.

This product does meet qualifications for LEED (Leadership in Energy and Environmental Design) projects as a Clear Wood Coating.

Master Painters Institute MPI # 121 (1WB.14XX), MPI # 128 (1WB.1427), MPI # 129 (1WB.1410)

1WB.14XX meets the performance properties of Federal Spec. #TT-C-1951

Aqua-Plastic™ Urethane Clears 1WB.14XX

**Surface Preparation**

Surface to be coated must be clean and free of dust, grease, dirt or wax. If wax is a suspect contaminant, remove with a commercial wax stripper. New interior wood must be sanded smooth. This product may not be used over sanding sealers containing silicone, wax or stearates. Use this waterborne clear as a self-seal and topcoat system allowing 2 to 4 hours dry time between coats and sanding lightly before applying.

**WARNING!** If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by logging onto Health Canada @https://www.canada.ca/en/health-canada/services/environmental-workplace-health/environmental-contaminants/lead/lead-information-package-some-commonly-asked-questions-about-lead-human-health.html

**Application**

This varnish may be applied by brush, roller or spray. Stir thoroughly before and occasionally during application. Do not shake. Best rolling results are achieved with a 6.4 mm (¼") short nap roller. For best brush application, use a good quality synthetic brush. When brushing or rolling, flow material on with a minimum of strokes. Thinning is not recommended, if necessary use water sparingly. Do not apply when surface or air temperatures are below 12.8 °C (55 °F). Sand lightly with fine sandpaper between coats. Apply Aqua-Plastic in thin coats to avoid prolonged milky appearance of the film.

**Clean Up**

Warm soapy water.

**Environmental Health & Safety Information**

Use only in a well ventilated area. Keep container closed when not in use. In case of spillage, absorb with inert material and dispose of in accordance with local regulations. Wash thoroughly after handling.

**KEEP OUT OF REACH OF CHILDREN**

**PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for additional health and safety information.**
