SUPER KOTE 5000®
WATERBORNE ACRYLIC-ALKYD
SATIN FINISH 203

Features
• Exceptional flow & leveling
• Provides a durable finish
• Outstanding adhesion
• Superior hide
• Soap & water clean up
• Low VOC

General Description
Super Kote 5000® Waterborne Acrylic-Alkyd Satin is the ideal choice for interior doors, trim, cabinets and walls. It delivers the desired flow and leveling characteristics of conventional alkyd paints. It provides a tough, satin finish that stands up to repeated washing and cleans up easily with soap and water.

Recommended For
Interior drywall, plaster, wood trim, doors, cabinets, previously painted metal and block in commercial, institutional and residential applications.

Limitations
• Apply when surface and air temperatures are between 50 °F and 90 °F
• Depending on drying conditions, it could take up to 30 days to reach optimum hardness and final sheen

Product Information

Colors — Standard:
White (1)

— Tint Bases:
Pastel Base (32), Tint Base (33), Deep Base (34) & Accent Base (36)
Only tint with Universal Colorants

— Special Colors:
Contact your dealer.

Certification & Qualifications:
VOC compliant in all regulated areas

The products supported by this data sheet contain a maximum of 50 grams per liter VOC / VOS (0.41 lbs/gal.) excluding water & exempt solvents

This product meets the qualifications for LEED (Leadership in Energy and Environmental Design) projects as a non-flat coating.

Super Kote 5000® Waterborne Acrylic-Alkyd Satin Finish 203

Surface Preparation
Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Knife off any protrusions and prime plaster before and after applying patching compound. Remove any powder or loose particles.

Primer: New surfaces should be fully primed. Previously painted surfaces should be primed or spot primed as necessary. There are a number of specialty primers available in our family of brands that can be used on difficult substrates such as bleeding woods, hard glossy surfaces, or other substrates where paint adhesion or stain blocking is a problem. Your dealer can recommend the right problem solving primer necessary to meet your needs.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Informational Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Environmental Health & Safety Information
WARNING!
Possible birth defect hazard. Contains, Trimethylolpropane, which may cause birth defects based on animal data.

Use only with adequate ventilation. Do not breathe vapors, spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer’s directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: Cancer and Reproductive Harm—www.P65warnings.ca.gov

Application
Stir product with a circular, lifting motion before you begin to paint. Super Kote 5000® Waterborne Acrylic-Alkyd Satin may be applied by brush, roller, pad or spray techniques, at a rate of application not to exceed 400 square feet per gallon. Surface texture and porosity will affect actual yield. For best brush application results, use a quality synthetic filament brush. For roller application, use a ¼” to 3/8” nap cover for smooth surfaces, a ⅛” nap cover for semi-rough surfaces and a ½” – 1” nap cover for rough surfaces. Do not jeopardize the success of your painting project by using poor quality applicator tools. Apply only when surface and air temperatures are between 50 °F and 90 °F.

Airless – Tip size and atomization pressures will vary with the type of equipment, viscosity and temperature. An orifice of .017 - .019 will provide the most satisfactory spray pattern. Super Kote 5000® Waterborne Acrylic-Alkyd Satin may be thinned with clean water, up to 15%, for spray application.

Clean up
Clean up with warm, soapy water followed by a clean water rinse. USE COMPLETELY OR DISPOSE OF PROPERLY. Dry empty containers may be recycled in a can recycling program. Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.

Keep out of reach of children
Protect from freezing

Refer to Safety Data Sheet for additional health and safety information.
