TOUGH WALLS
ACRYLIC PAINT & PRIMER
SEMI-GLOSS N22

Features

- Interior Acrylic Paint & Primer
- Scrubbable
- Excellent Hiding
- Spatter Resistant
- Fast Dry

General Description

Tough Walls Acrylic Semi-Gloss incorporates the latest in advanced acrylic formulating technology. The rich, semi-gloss finish is extremely stain resistant for easy cleaning maintenance. The spatter free formula applies beautifully and dries to a smooth, durable finish that can be scrubbed repeatedly without damaging the film. Tough Walls Semi-Gloss is a perfect choice for residential or commercial projects.

Recommended For

For drywall, plaster, wood, metal and masonry in residential, commercial and institutional applications. It can be scrubbed over and over without film damage. Great for hallways, family rooms, common areas and living rooms, dining rooms & bedrooms. Use on interior walls and woodwork.

Limitations

- Apply only when surface and air temperatures are above 50 °F (10 °C)
- Not for exterior use

Product Information

Colors — Standard:
White (1)

— Tint Bases:
Pastel Base (32), Tint Base (33), Accent Base (36)
Tint with Benjamin Moore® Gennex® colorant

— Special Colors:
Contact your dealer

Certifications & Qualifications:

VOC compliant in all regulated areas
Qualifies for LEED® v4 Credit
Qualifies for CHPS low emitting credit
(Collaborative for High Performance Schools)
CDPH v1 Emission Certified
Master Painters Institute MPI # 54

Technical Assistance:

Available through your local authorized independent dealer.

Manufactured by Benjamin Moore & Co. 101 Paragon Drive, Montvale, NJ 07645 Tel: 866-708-9180 www.coronadopaint.com M72 N22 EN 112921
Surface Preparation

Surfaces to be painted must be clean, dry, and free of dust, dirt, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after apply the contaminated. New shiny non-ferrous metal surfaces that must be thoroughly cleaned with an Oil & Grease Emulsifier

Primer/Finish:

Non-Ferrous Metal (Galvanized & Aluminum): All new metal surfaces must be thoroughly cleaned with an Oil & Grease Emulsifier to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion.

Primer: Rust Scat® Acrylic Metal Primer (36)
Finish: 1 or 2 coats of Coronado® Tough Walls Semi-Gloss (N22)

Repaint, All Substrates: Prime bare areas with the primer recommended for the substrate above.

Application

Stir product with a circular, lifting motion before you begin to paint. Tough Walls Acrylic Paint & Primer Ultra Flat may be applied by brush, roller, pad or spray techniques, at a rate of application not to exceed 450 square feet per gallon. Surface texture and porosity will affect actual yield. For best brush application results, use a quality polyester or nylon filament brush. For roller application, use a 3/8” nap cover for smooth surfaces, a 1/2” nap cover for semi-rough surfaces and up to a 1½” nap cover for rough surfaces. Do not jeopardize the success of your painting project by using poor quality applicator tools. Apply only when surface and air temperatures are between 50 °F – 90 °F.

Spray, Airless:

Fluid Pressure —1,500 to 3,000 PSI; Tip — 0.011 - 0.015 Orifice.

Clean Up

Clean up with warm, soapy water followed by a clean water rinse. USE COMPLETELY OR DISPOSE OF PROPERLY. Dry empty containers may be recycled in a can recycling program. Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.

Environmental Health & Safety Information

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer’s directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: This product contains isothiazolinone compounds at levels of <0.1%. These substances are biocides commonly found in most paints and a variety of personal care products as a preservative. Certain individuals may be sensitive or allergic to these substances, even at low levels.

FIRST AID: In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL – Absorb with inert material and dispose of as specified under “Clean Up”.

KEEP OUT OF REACH OF CHILDREN PROTECT FROM FREEZING

Refer to Safety Data Sheet for additional health and safety information.
