DRYWALL PRIMER
380

Features
- High hiding
- Excellent sealing & holdout
- Quick drying

General Description
An acrylic primer for interior use on new or previously painted drywall and plaster. Provides hiding capabilities, excellent sealing and holdout for a uniform finish, and dries quickly.

Recommended For
For priming new or previously painted, interior substrates such as drywall, plaster, non-bleeding wood & masonry. Designed for use in commercial and residential spaces.

Limitations
- Do not apply when air and surface temperatures are below 50 °F (10 °C)
- For interior use only

Product Information

Colors — Standard:
White (00)
May be tinted with up to 2.0 fl. oz. of Benjamin Moore® Gennex® colorants per gallon.

— Tint Bases:
NA

Drywall Primer (380)

Surface Preparation
Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water-soluble materials, and mildew. Remove any peeling or scaling paint and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust.

New plaster surfaces must be allowed to cure (30 – 60 days) before priming. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Remove any powder or loose particles before priming.

Difficult Substrates: Benjamin Moore® offers a number of specially primers for use over difficult substrates such as bleeding woods, grease, crayon markings, hard glossy surfaces, galvanized metal, or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin® retailer can recommend the right problem-solving primer for your special needs.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead

Primer/Finish Systems
New surfaces should be fully primed, and previously painted surfaces may be primed or spot primed as necessary. For best hiding results, tint the primer to the approximate shade of the finish coat.

Special Note: Certain custom colors require a Deep Color Base Primer tinted to a special prescription formula to achieve the desired color. Consult your retailer.

Drywall:
Primer: Drywall Primer (380)
Finish: 1 – 2 coats of the appropriate Benjamin Moore® finish coat
Plaster (cured):
Primer: Drywall Primer (380)
Finish: 1 – 2 coats of the appropriate Benjamin Moore® finish coat

Wood and engineered wood products:
Primer: Drywall Primer (380)
Finish: 1 – 2 coats of the appropriate Benjamin Moore® finish coat

Smooth Pour or Pre-cast Concrete:
Primer: Drywall Primer (380)
Finish: 1 – 2 coats of the appropriate Benjamin Moore® finish coat

Repaint, All Substrates: Prime bare areas with the primer recommended for the substrate above.

Application
Stir thoroughly before use. Apply by brush, roller, or spray. Apply generously using overlapping strokes, brushing or rolling from unpainted into painted areas.

Apply before and after filling nail holes, cracks, and other surface imperfections. Sand smooth when dry.

This product can also be sprayed.

Spray, Airless:
Fluid Pressure: 1,500 – 2,500
Tip: .013 – .017

Thinning/Clean Up
Thinning is unnecessary, but if required to obtain desired application properties, a small amount of clean water may be added. Never add other paints or solvents.

Clean up: Clean brushes, rollers, and other painting tools in warm soapy water after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

Environmental, Health & Safety Information
Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin.

WARNING: This product can expose you to chemicals including Titanium dioxide, which are known to the State of California to cause cancer, and Ethylene glycol which are known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov

FIRST AID: In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL – Absorb with inert material and dispose of as specified under “CleanUp”.

KEEP OUT OF REACH OF CHILDREN
PROTECT FROM FREEZING
