SUPER KOTE 5000®
EXTERIOR ACRYLIC FLAT
801 LINE

Features
- Acrylic Exterior Paint
- Fast Drying
- Water Clean Up

General Description
This Acrylic Exterior Paint is designed for service over new or previously painted surfaces in good condition. It is formulated for exceptional coverage and dries dust and bug free in thirty minutes. Provides a durable and protective finish on any properly primed and prepared exterior surface.

Recommended For
For properly prepared exterior wood, hardboard, masonry, metal and galvanized surfaces in commercial, institutional and residential applications. Use on exterior siding, foundations, fascia, shutters or retaining walls. Contains an agent which inhibits growth of mildew on the surface of the paint film.

Limitations
- Apply only when surface and air temperatures are above 50 °F (10 °C).
- Do not apply if rain is expected within 12 hours

◊ Reported values are for White, Contact dealer for values of other bases or colors.
Surface Preparation
Surfaces must be clean and free of grease, wax, and mildew. Remove any chalk and loose or scaling paint. If previously coated with cement-base waterproofing paints, clean by sandblasting. Glossy surfaces must be dulled. Un-weathered areas such as eaves, ceilings, and overhangs should be washed with a detergent solution and/or rinsed with a strong stream of water from a garden hose to remove contaminants that can interfere with proper adhesion. Stains from mildew must be removed by cleaning with an anti-mildew wash prior to coating the surface. Caution: Refer to the anti-mildew wash technical data and material safety data sheet for instructions on its proper use and handling. For metal surfaces, remove rust. Wipe down with paint thinner to remove surface oils. All new masonry surfaces must be power washed or brushed thoroughly with stiff fiber bristles to remove loose particles. New masonry substrates must be allowed to cure for 30 days before priming or painting.

Primers: New surfaces should be fully primed. Previously painted surfaces should be primed or spot primed as necessary. There are a number of specialty primers available in our family of brands that can be used on difficult substrates such as bleeding woods, hard glossy surfaces, or other substrates where paint adhesion or stain blocking is a problem. Your dealer can recommend the right problem solving primer necessary to meet your needs.

WARRANTY: Manufacturer warrants that this product when used in accordance with the label instructions will not: 1. blister from properly prepared and primed surfaces, 2. peel from properly prepared and primed surfaces, and 3. wear down or weather to a white cast within 3 years from date of application. Under normal use, this warranty will apply to new and existing structures for a period of 3 years from date of application. Systems without ventilation may take up to 6 months to breathe and may require additional priming or painting.

Application
Stir thoroughly. Apply by brush (synthetic filament), roller or spray. Length of roller nap depends upon the texture of the surface. Thinning is not usually required for brush or roller application. Apply a full, even coat. Do not apply directly over chalky surfaces or bleeding stains. Apply only when surface and air temperatures are above 50 °F (10 °C).

Spray, Airless:
Length of roller nap depends upon the texture of the surface. Thinning is not usually required for brush or roller application. Apply a full, even coat. Do not apply directly over chalky surfaces or bleeding stains. Apply only when surface and air temperatures are above 50 °F (10 °C).

Clean Up
Clean up with warm, soapy water.

Use only with adequate ventilation. Do not breathe vapors, spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer’s directions for respirator use. Close container after each use. Wash thoroughly after handling.

Environmental Health & Safety Information

WARNING!
Possible birth defect hazard. Contains Carbamic acid, 1H-benzimidazol-2-yl-, methyl ester, which may cause birth defects based on animal data.

Use only with adequate ventilation. Do not breathe vapors, spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up.
