QUICK DRY ACRYLIC SPRAY DTM V300

Features

- Ideal solution for factory jobs requiring minimal “dry to handle” time
- For wood, metal and masonry surfaces
- Hard scratch- and impact-resistant coating
- Recommended for machinery, tanks, factory equipment and more

Recommended For

Corotech® Quick Dry Acrylic Spray DTM is for interior and exterior use on Steel, Galvanized Steel, Aluminum, Masonry, Concrete, Wood Trim, Machinery, Plaster, Drywall, and Properly Prepared Ferrous and Non-Ferrous Metals for tanks, equipment and other fixtures.

Limitations

- Do not apply if material, substrate or ambient temperature is below 10 °C (50 °F). Relative humidity should be below 90%.
- Do not apply if within 5 degrees of dew point or if rain is expected within 12 hours of application.
- Not for immersion service.

Product Information

Colours — Standard:
Clear (00), White (01), Bronzetone (62), Light Gray (71), Aluminum (78), Black (80)

— Tint Bases:
Pastel Base (85), Tint Base (86), Deep Base (87), Clear Base (88).
Tint with Universal Colorants Only

— Special Colours:
Contact your retailer.

Certifications & Qualifications:
The products supported by this data sheet contain a maximum of 100 grams per litre VOC / VOS (0.83 lbs/gal.) excluding water & exempt solvents. This product is compliant as an Industrial Maintenance Coating.
Masters Painters Institute MPI # 114
Meets requirements for SSPC Paint Specification #24
Meets requirements for Federal specification TT-P-1511B
This product has been approved by CFIA (Canadian Food Inspection Agency) for use in Food Processing Facilities

Quick Dry Acrylic Spray DTM V300

Surface Preparation

Prior to painting any surface, area must be clean, dry and free of all grease, dirt, dust, oil and wax. Remove all loose and peeling paint by wire brushing, scraping or sanding. Fill holes and cracks and sand smooth. Dull glossy surfaces by sanding. Moderate to heavily rusted areas must be thoroughly cleaned and primed.

Ferrous Metal: Remove any active rusted areas according to the surface preparation instructions. Apply directly to properly prepared, ferrous metal surfaces. Additional protection can be attained by using a rust inhibitive primer. Apply one or two finish coats as needed.

For enhanced adhesion and durability, apply Corotech® Waterborne Bonding Primer V175 prior to top coating.

Non-Ferrous Metal (Galvanized & Aluminum): Galvanized steel normally comes from the mill chemically treated or passivated, to prevent white rusting or oxidation of the galvanized surface during the time it is being stored or shipped to the job site. Due to this, the surface must be thoroughly cleaned with Corotech® Oil & Grease Emulsifier V600 or solvent wiping in accordance with SSPC-SP1 prior to coating. Apply one or two finish coats as needed. For enhanced adhesion and durability, apply Corotech® Waterborne Bonding Primer V175 prior to top coating.

Wood Surfaces: Prime bare spots and new wood with a quality acrylic primer. Apply one or two finish coats as needed.

Plaster and Dry Wall: Prime new drywall and fully cured plaster with a quality acrylic primer. Apply one or two finish coats as needed.

Concrete Surfaces: Allow new concrete to age for a minimum of 30 days. New or old unpainted concrete should be etched with a muriatic acid solution and then rinsed thoroughly with water. Be sure to follow the manufacturer’s instructions when mixing and using solution. (Protect skin and eyes by wearing rubber gloves and goggles.) Rinse surface thoroughly with clean water. Allow surface to dry completely before coating. Old painted concrete should be sanded. Prime with a quality acrylic primer. Apply one or two finish coats as needed.

Glossy Surfaces: Glossy surfaces must be deglossed to obtain a surface profile prior to coating. The preferred method is thoroughly sanding the surface area. Areas that cannot be properly deglossed should be primed with Corotech® Waterborne Bonding Primer V175 prior to finish coating.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up workplace with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by logging onto Health Canada - some-commonly-asked-questions-about-lead-human-health.html

Application

Mix the product thoroughly before application. The use of a low speed drill mixer is recommended. Thin with Water only.

Airless Spray (Preferred Method): Tip range between .015 and .019. Total fluid output pressure at tip should not be less than 3400 psi.

Air Spray (Pressure Pot): DeVilbiss MBC or JGA gun, with 704 or 765 air cap and Fluid Tip E.

Brush: Synthetic Bristle only.

Roller: Short Nap Cover: Less than 12.7 mm (½”).

NOTE: Do not allow material to remain in hoses, gun or spray equipment. Thoroughly flush all equipment with recommended thinner. Do not apply if material, subgrade or ambient temperature is below 10 °C (50 °F). Relative humidity should be below 90%. Do not apply if within 5 degrees of dew point or if rain is expected within 12 hours of application.

Test Data

- **Pencil Hardness**: 2B
- **Flexibility (ASTM D1737)**: Pass 3.175 mm Mandrel
- **Dry Heat Resistance**: 65.6 °C (150 °F)
- **Wet Heat Resistance**: 51.7 °C (125 °F)
- **Adhesion (ASTM D3359)**: Pass 5B
- **Salt Fog Resistance (ASTM B171)**: Rust Breakthrough: 10 Rating Rust Area: 0.01%
- **Exterior Exposure – 45 degrees/South Florida**: 100 mg Loss
- **Gloss Retention**: 80% or better

CHEMICAL RESISTANCE GUIDE (NON-IMMERSION)

- **Fresh Water**: Excellent
- **Salt Water**: Good
- **Acids**: Fair
- **Alkalis**: Fair
- **Solvents**: Not Recommended
- **Fuel**: Not Recommended
- **Acidic Salt Solutions**: Fair
- **Alkaline Salt Solutions**: Fair
- **Neutral Salt Solutions**: Good

SYSTEMS RECOMMENDATIONS

COMPATIBLE PRIMERS & INTERMEDIATES

- V132 Line, V142 Line, V155, V150 Line, V110, V175 and Other Acrylic and Acrylic/Alkyd Primers
- For substrates other than listed above, or for usage in severe environmental conditions, please consult with Corotech® Technical Service.

Clean Up

Clean with warm, soapy water.

Environmental Health & Safety Information

WARNING!

Not a dangerous substance or mixture according to the Globally Harmonized System (GHS).

Keep container closed when not in use. In case of spillage, absorb with inert material and dispose of in accordance with local regulations. Wash thoroughly after handling. Refer to Safety Data Sheet for additional health and safety information.

CAUTION: All floor coatings may become slippery when wet. Where non-slip characteristics are desired, a small amount of clean sand may be added. Stir often during application.

This document represents hazards of the product referenced above. Refer to the individual Safety Data Sheet for hazards of the specific product you will be using.

KEEP OUT OF REACH OF CHILDREN FOR PROFESSIONAL USE ONLY KEEP FROM FREEZING

Refer to Safety Data Sheet for additional health and safety information.
