Carcinogenicity

The information below indicates whether each agency has listed any ingredient as a carcinogen:.

| Chemical name | IARC | NTP | OSHA |
|------------------------------|----------------------|-------------|--------|
| | 2B - Possible Human | | Listed |
| Titanium dioxide | Carcinogen | | |
| | 2B - Possible Human | | Listed |
| Cobalt bis(2-ethylhexanoate) | Carcinogen | | |
| | 1 - Human Carcinogen | Known Human | Listed |
| Silica, crystalline | - | Carcinogen | |

• Crystalline Silica has been determined to be carcinogenic to humans by IARC (1) when in respirable form. Risk of cancer depends on duration and level of inhalation exposure to spray mist or dust from sanding the dried paint.

• Although IARC has classified titanium dioxide as possibly carcinogenic to humans (2B), their summary concludes: "No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium dioxide is bound to other materials, such as paint."

• Cobalt and cobalt compounds are listed as possible human carcinogens by IARC (2B). However, there is inadequate evidence of the carcinogenicity of cobalt and cobalt compounds in humans.
