

# SUPER KOTE 5000<sup>®</sup>

## ACRYLIC LATEX ENAMEL EGGSHELL 30 LINE

### Features

- Premium commercial acrylic latex designed for the professional painter
- No spatter and fast-dry formula provide fast production
- Professional finish withstands washing
- Soap and water cleanup
- Low VOC

### Recommended For

Interior drywall, plaster, wood, metal, masonry and stucco in commercial, institutional and residential applications. It may be washed repeatedly without film damage. Perfect for bedrooms, hallways or wherever an eggshell enamel is desired.

### General Description

Super Kote 5000<sup>®</sup> Acrylic Latex Eggshell Enamel is designed for commercial projects—when getting the job done quickly is a priority. With low spatter and easy application, this premium-quality, vinyl-acrylic formula delivers dependable quality and productivity. It applies easily without spattering, covers most surfaces in one coat and may be washed repeatedly without film damage.

### Limitations

- Apply only when surface and air temperatures are above 50 °F (10 °C).

### Product Information

Colors — Standard:	Technical Data <sup>◇</sup>	White
White (1)	Vehicle Type	Vinyl Acrylic
	Pigment Type	Titanium Dioxide
	Volume Solids	32.0 ± 1.0%
	Coverage per Gallon at Recommended Film Thickness	300 – 400 Sq. Ft.
	Recommended Film Thickness	– Wet 4.0 to 5.3 mils – Dry 1.3 to 1.7 mils
	Depending on surface texture and porosity. Be sure to estimate the right amount of paint for the job. This will ensure color uniformity and minimize the disposal of excess paint.	
	Dry Time @ 77 °F (25 °C) @ 50% RH	– Tack Free 30 Minutes – To Recoat 4 Hours
	High humidity and cool temperatures will result in longer dry, recoat and service times.	
	Dries By	Coalescence
	Viscosity	95 – 100 KU
	Flash Point	200 °F or greater (TT-P-141, Method 4293)
	Gloss / Sheen	Eggshell (15 - 20 @ 85°)
	Surface Temperature at Application	– Min. 50 °F – Max. 90 °F
	Thin With	Clean Water
	Clean Up Thinner	Warm, Soapy Water
	Weight Per Gallon	11.0 lbs.
	Storage Temperature	– Min. 40 °F – Max. 95 °F
	<b>Volatile Organic Compounds (VOC)</b>	
	50 Grams/Liter	0.42 Lbs./Gallon

<sup>◇</sup> Reported values are for White. Contact dealer for values of other bases or colors.

## Super Kote 5000® Acrylic Latex Enamel Eggshell 30 Line

### Surface Preparation

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or flaking paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Knife off any protrusions and prime plaster before and after applying patching compound. Remove any powder or loose particles.

**Primers:** New surfaces should be fully primed. Previously painted surfaces should be primed or spot primed as necessary. There are a number of specialty primers available in our family of brands that can be used on difficult substrates such as bleeding woods, hard glossy surfaces, or other substrates where paint adhesion or stain blocking is a problem. Your dealer can recommend the right problem solving primer necessary to meet your needs.

**WARNING!** If you scrape, sand or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH-approved respirator to control lead exposure. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to [www.epa.gov/lead](http://www.epa.gov/lead).

### Application

Stir thoroughly. Apply by brush (synthetic filament), roller or spray. Length of roller nap depends upon the texture of the surface. Thinning is not usually required for brush or roller application. Apply a full, even coat. Do not apply directly over chalky surfaces or bleeding stains. Apply only when surface and air temperatures are above 50 °F (10 °C).

**Spray, Airless:** Fluid Pressure—1,500 to 2,000 PSI;  
Tip—.017 - .019 Orifice

### Clean Up

Clean up with warm, soapy water.

USE COMPLETELY OR DISPOSE OF PROPERLY. Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

### Environmental Health & Safety Information

**Use only with adequate ventilation.** Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

**WARNING** Cancer and Reproductive Harm—  
[www.P65warnings.ca.gov](http://www.P65warnings.ca.gov)

**FIRST AID:** In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

**IN CASE OF SPILL** – Absorb with inert material and dispose of as specified under "Clean Up".

**KEEP OUT OF REACH OF CHILDREN  
PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for  
additional health and safety information.**
